

Mouse anti CtBP2 antibody, BD Biosciences #612044
Immunogen: mouse CtBP2 aa. 361-445

Fig1. Western blot analysis of Ntera2 nuclear extract.

Fig2. CtBP2 antibody specificity was determined by transfection using CtBP2 siRNA (Dharmacon smart pool) followed by Western blot analysis. siGFP was used for a mock transfection. Western blots were probed with antibodies against CtBP2 (BD 612044), CtBP1 (BD 612042) and actin. As shown, CtBP2 protein levels were reduced when treated with siCtBP2, but not in the mock sample. CtBP1 protein levels as well as the loading control actin remained the same.
